Brussels — The Polisario Front representative in Europe and the European Union, Oubi Bouchraya Bachir, said that the Moroccan government must to organize the referendum on self-determination of the Sahrawi people in accordance with international law.

In a statement to Radio Algeria International channel, in response to the speech made by King Mohamed VI on the occasion of his 60th birthday, King and the people, Bouchraya said that the King of Morocco has no choice to break the deadlock and settle the conflict that started in 1991 with the Sahrawi side under the auspices of the United Nations and to organize a referendum on self-determination.

"The king's speech did not bring anything new. He has only repeated the same untruths trying, as always, to blame his regional and international partners in Africa and Europe," added Bouchraya.

"The King of Morocco must face the truth and understand that all the problems of his regime at the regional and international levels, stem from his expansionist policy in Western Sahara," he added.
